

Meet, train, mentor and collaborate in real time

- Is your company looking to reduce the cost for training by implementing a blended strategy for learning delivery?
- Do you have a geographically dispersed workforce that requires training at short notice on new regulatory requirements?
- Are you working with IT Training and looking to improve the end-user adoption to support the success of a new application roll-out
- Are you considering integrating virtual classroom technologies to your Learning Management System in order to provide a richer learning experience?
- Or would you like to see how the latest advances in rich media technology can help your business

If your answer is yes to any of these questions, the Academy Rooms online classroom technology could be something for you!

Please speak to a member of our team and you can join our interactive, online session where you can see and try the capabilities of the virtual classroom in a live collaborative environment.

PathFinder application software enables effective online learning and training. It is now a key part of AccessAcademy's Workforce Optimisation Solutions offering. With PathFinder VLE (Virtual Learning Environment), organisations share knowledge and exchange information with customers, partners, prospects and employees around the world in real-time, for more productive, cost-effective learning.
