

Define Success

ASSESS aligns people with business strategy to achieve success.

What does “good” look like in your organisation

Already know? Link your competency models to our assessment tools.

Need a model? Let us help you build one... it only takes a few days!

Multiple models? We can train you to create your own models

Hire / Promote the Best

ASSESS integrates a series of assessments to evaluate job fit

Who will be the most successful and satisfied in their job?

Use ASSESS Selection Reports to identify the best internal and external candidates. Put the right people in the right roles.

Develop Excellence

ASSESS includes tools to help staff grow and develop in their roles

Are people doing the right things? The important things?

Use ASSESS Development Reports and Assess 360 Feedback to provide individualised feedback and development guidance. Focus development on improved job success

ASSESS is a web-based platform that provides in-depth assessment of managers and professionals. ASSESS incorporates personality, intellectual abilities, and behavioural feedback – providing a powerful combination for evaluating staff against your model of success.

- Define competencies in a few days that match your business objectives
- Measure the existence of those competencies in your people
- Obtain 360 behavioural feedback against the competencies
- In one system, with no expensive annual renewal fees

Workforce Optimisation Solutions

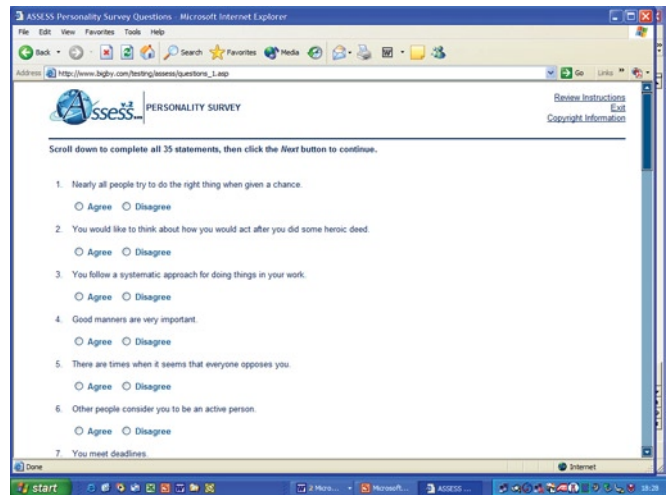

How does ASSESS work?

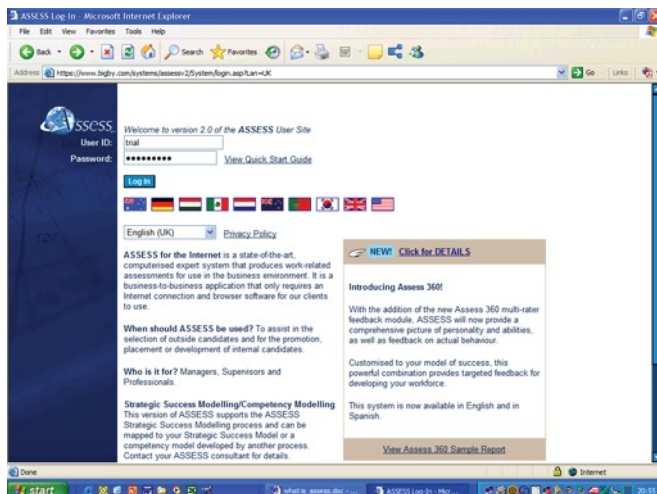

The system is web enabled, exists in many languages and can be accessed from anywhere in the world where there is a computer linked to the Internet. Once the competence model has been determined it is loaded to the main server and becomes available for use by your organisation.

The candidate logs into the website and uses the short account code and password provided by an administrator. They choose the relevant language and log in.

The questionnaire is presented to them, which is an agree/disagree set of statements

Upon completion of the questionnaire an administrator is notified by email that the candidate has completed the survey and logs into the reports site, chooses the relevant language and produces the required reports.

The report is generated in real time and can be printed or emailed.
