## **AccessAcademy wins a place on Ministry of Defence Framework Agreement**

Workforce optimisation specialists AccessAcademy have been successful in securing a place as a participating contractor in the Multi-Participant Framework Agreement for Technical Support (FATS).

AccessAcademy's success was based on their tender response to an invitation from the MOD to participate in the competitive tendering process. This was the result of an initiative set up earlier this year by the MOD to encourage competition with businesses of all sizes with the necessary skills and expertise to participate in the tendering process. The framework agreement which commenced in August is valid for one year.

Commenting on their success AccessAcademy Managing Director, Christian Greenshaw stated, "Participating in the tendering process was quite a task for an organisation of our size. I am absolutely delighted that our efforts have paid off. We are really looking forward to the opportunity to work with the MOD over the coming year and identifying new ways that our technologies and expertise can help to resolve some of the major challenges associated with the learning and development responsibilities of such a large scale organisation".
