

AccessAcademy announces the Launch of the PathFinder™ Compliance System

PathFinder™ Compliance is the latest addition to the PathFinder™ product suite. In today's business environment the requirements for meeting regulatory compliance and certification are constantly changing; our compliance solution quickly brings together information from a number of sources, streamlines resulting learning programmes and creates an auditable process.

What is the PathFinder™ Compliance System?

After carrying out extensive research in the market place we have developed a robust automated solution that ensures cost-effective, defensible compliance readiness across an enterprise. Whether your organisation is in the Public sector, pharmaceuticals, energy, manufacturing, healthcare, financial services, our solution will support your training compliance:

Key Features

- Rapidly detects and reports on areas of risk
- Links compliance requirements to job role
- Provides automated tracking and notification when compliance certification and recertification are required.
- Provides for full audit trail and reporting capabilities in accordance with any regulatory reporting requirements
- Reminds individuals, managers and compliance officers of overdue compliance training
- Content is AICC and SCORM compliant
- Reports can be tailored to individual requirements
- All technical and software support managed by AccessAcademy
- Customised portal
- Multiple language function

Benefits of the new system

- Manages the changes in the regulatory landscape
- Ensures employees have the required training and certifications for their job
- Tracks the compliance skill levels of employees across the organisation
- Replaces disparate systems with a single source for historic data
- Easily integrates with existing LMS systems
- No additional internal resources required
- No additional hardware or software costs
